## SUMMARY OF INFORMATION

PROCEDURE: In using the pendulum, I started with it still. I held it over the dead center of a piece of paper which had a line down the center and "Y" written on one side and "N" written on the other. The monitor read the number of the question (not the question). I closed my eyes and waited to feel a twitch in my arm (the same feeling I get when I get an ideogram). I then would open my eyes to see which way the pendulum was swinging and record the result.

## RESULTS:

| #   | My Response | Correct Answer | Score |
|-----|-------------|----------------|-------|
| 1.  | N           | Y              | Wrong |
| 2.  | Y           | N              | Wrong |
| 3.  | Y           | N              | Wrong |
| 4.  | N           | N              | Right |
| 5.  | N           | ?              | ?     |
| 6.  | N           | Y              | Wrong |
| 7.  | Y           | Y              | Right |
| 8.  | N           | N              | Right |
| 9.  | Y           | Y              | Right |
| 10. | Y           | Y              | Right |
